

Connie Patient Connect

What is Connie?

Connie is Connecticut's official Health Information Exchange (HIE). It provides a safe and fast way for patients and providers to access their health information. For providers, this means they have all the information they need to focus on what matters most: taking care of your health. For patients, it means one-stop access to your own health information for free. If you no longer want Connie to share your health information, you can opt out anytime.

Get access to your health information using Connie Patient Connect!

Free, easy access to your health information gives you control over your healthcare — and helps you approach conversations with your healthcare team more informed about your test results and treatment options.

To access your personal health information available through Connie, use the QR code to create an account, or go to <https://conniepatientconnect.org>

Features

Daily Updates

View your health information, updated daily from your healthcare providers.

Data

Allow select caretakers and family members access to your health data to help you manage your care, and track who has access your account, when, and why.

Create Specialty Files

Create and organize your own health files from your health records, like medication lists or lists of your visits to different providers.

Personalize Your Information

Add appointments, to-do lists, and additional health information, like over-the-counter medications or blood pressure results you have taken at home.
