

“I feel better knowing that all my doctors can access my health records.”

Connected care is better care.

Connie is the designated Health Information Exchange (HIE) in Connecticut. An HIE is a safe, confidential way of sharing health information electronically among doctors' offices, hospitals, labs, radiology centers, and other health care providers. Connie allows all those coordinating your care to view your medical history, providing you with faster visits, fewer errors and better, patient-centered care.

This office is connected with Connie, the CT Health Information Exchange.
